EMPLOYEMNT HISTORY

Software Engineer, *Zero Logic Space - Lalitpur* Nov 2023 - Present

- Enabled third-party system integration for 3+ partner platforms by creating a RESTful API for external application connectivity.
- Increased application efficiency and flexibility by 30% by developing an API that enabled seamless data access and manipulation from multiple sources.
- Improved security and access control for over 500 users by implementing robust user authentication and authorization **REST APIs**.
- Boosted media management performance by 40% by leveraging **AWS S3** for secure and scalable file storage, **EC2** for hosting, and **ECR** for container management.
- Improved user authentication speed and reliability by creating auth npm package for secure login and user management.
- Expanded platform capabilities by integrating 4+ third-party services, including payment gateways, Google login, and email providers.
- Containerized and deployed scalable applications using **Docker** to ensure consistent environments from development to production.
- Increased code stability and reduced bugs by 20% through regular improvement and maintenance of the existing codebase.

Frontend Developer Intern, *Zero Logic Space - Lalitpur* Jul 2023 – Sep 2023

- Reduced frontend bugs by 15% and improved team efficiency by adhering to code consistency and best practices through collaborative development.
- Enhanced UI performance and maintainability by regularly improving and maintaining the existing codebase.
- Delivered responsive and user-friendly web interfaces by building interactive applications using Next.js, Typescript, and Tailwind CSS.
- Strengthened app security and user access controls by integrating REST APIs for authentication and authorization.

PROJECT EXPERIENCE

- **NPRC**, a digital platform for managing physiotherapy appointments, tracking patient progress, exercises, and payments efficiently along with login session management using Auth0.
- Contributed to **PocketSeq,** a Japanese Airbnb-style platform, by maintaining the system, resolving critical functionality issues, and fixing complex logical bugs to ensure seamless user experiences and platform reliability**.**
- Developed and maintained **Needy Store**, an e-commerce platform, featuring product/category management, order processing, email integration, an admin panel, and Supabase-powered database and APIs, delivering a seamless shopping experience.
- **Recs Homes**, a website for architecture firm displaying building construction processes from blueprints to 3D modeling. Designed projects tracking and management system, supporting dual-language functionality (Nepali and English) for an engaging user experience.
- **Z-Auth,** is a comprehensive Node.js npm package that provides a complete authentication and authorization system with built-in role-based access control (RBAC**).**
- **Lumle**, a dynamic restaurant website and android mobile app, designed to highlight diverse menus, facilitate online orders, and enable seamless table reservations, and integrating AWS S3 for media management and third-party email service integration, supporting dual-language functionality (Finnish and English).
- Developed **NjangiBiz** app using **React Native**, improving mobile user experience with smooth navigation and app responsiveness.

EDUCATION

B.Sc. Computer Science and Information Technology, Kathford International College, Lalitpur Sep 2019 – Aug 2024

SKILLS

- **Web Full Stack Development** (React.js, Next.js, Node.js, Express, React Native, AWS, MongoDB, PostgreSQL, Docker, Typescript, Tailwind CSS).
- **UI/UX** (Figma, Photoshop, Wire-framing, Prototyping).
- **Performance & Monitoring** (Optimization, Lazy Loading, Logging).

SCHOLARSHIPS

Received the EB Pearls Scholarship in 2019 for academic excellence Sep 2019 – Aug 2024
